---

to:

Dear GA Researcher,

Please find enclosed the result of my GA bibliography database query. For further information see [1].

I would be happy if you could send me other references that you perhaps manage to find on the subject. It would be also a pleasure to include your contributions to the bibliography.

Yours,

Vaasa
August 19, 1994

Jarmo T. Alander
acting prof. of production automation

Notations

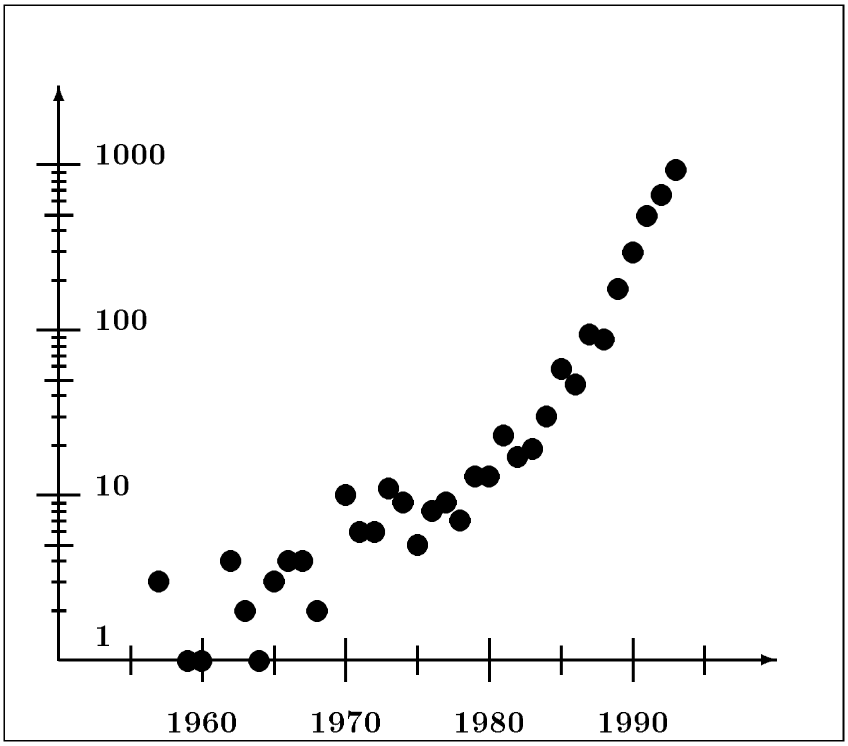
†(ref) = the bibliography item does not belong to my collection of genetic papers.
(ref) = citation source code. ACM = ACM Guide to Computing Literature, EEA = Electrical & Electronics Abstracts, CCA = Computers & Control Abstracts, EI = The Engineering Index, DAI = Dissertation Abstracts International, P = Index to Scientific & Technical Proceedings, etc
* = only abstract seen.
? = data of this field is missing (BiBTeX-format).

An Indexed Bibliography of Genetic Algorithms:

Years 1957-1993

compiled by

Jarmo T. Alander



Art of CAD ltd., Espoo, Finland
Preliminary Edition

This bibliography contains over 3000 references to research contributions in genetic algorithms and related fields and applications in
artificial intelligence, artificial life, classifier systems, computer aided design, control, engineering, evolution strategies, genetic programming, image processing, implementations of genetic algorithms, machine learning, neural networks, optimization, parallel processing, robotics, signal processing, scheduling, theory of genetic algorithms, TSP, etc ... books, theses, journal articles, conference papers, reports, patents.

- references to over 3000 genetic algorithms research contributions
- several indexes including author and subject indexes
- an alphabetical author index of over 2400 authors
- an alphabetical journal index
- references to theses from over 60 universities
- references to reports from over 100 universities and institutions
- statistical summaries
- list of most active GA research centers
- list of most active GA researchers
- etc

ISBN 951 - 96893 - 1 - 1
