Changes between HIPPI-Serial Rev 2.1 and Rev 2.2

January 19, 1996

The only change was to remove annex A.3 which read:

> **A.3 XMUX and XDEMUX availability**
>
> Applied Micro Circuits Corporation (AMCC), part number S2026 is an example of a suitable XMUX, and part number S2027 is an example of a suitable XDEMUX. This information is given for the convenience of the users of this standard and does not constitute an endorsement by ANSI, or other publisher of this standard, of these products.

This text was removed since AMCC no longer supports the devices as standard products due to low volume. AMCC has committed to supporting existing customers of the devices.

Original annex A.4 was renumbered to A.3, and the table of contents fixed accordingly.
